Module 5. Exponential & Logarithmic Models

PROBLEM:

You are provided with a series of x,y coordinates:

x	y
2	0.08
4	0.12
6	0.18
8	0.25
10	0.36
12	0.52
14	0.73
16	1.06

Define a model in GeoGebra or Desmos to calculate the value of y when x = 22.
